

# Vivo Connect

Ties Vivo 50 and 60 real time data to your PDM system

Vivo Connect is a brand new software from Breas for effective data management. Hospitals or institutions can now extract data from the Vivo 50/60, for follow-up of treatment and integrate Vivo 50/60 data with local PDM systems. This can now be done via Vivo Connect which includes a Developers Manual and a CD with '.dll' communication software.

Vivo Connect consists of a dynamic link library (dll) which manages communication between Breas medical devices Vivo 50 and Vivo 60 from Windows based third party PC systems. By means of the library a system may read different kind of real time data and current settings from one or more Vivo 50/60.
